E-IWF 14 provides the Internet working necessary to translate from the specialized air-interface encoding methods directly to the voice-over-IP encoding utilized for data transmissions over the Internet. Voice-over-IP is not streaming media.

The Applicant respectfully submits that the Examiner is reading the functionality of various elements within the Sicher arrangement in an extremely broad manner which is unsupported by the teachings within the Sicher patent. PCM conversions of data frames does not equate to the claimed streaming media structures. The above discussion with respect to claim 2 addresses the Examiner's additional points.

#### CONCLUSION

Thus, the Applicant submits that the pending claims are in condition for allowance. Accordingly, both reconsideration of this application and its swift passage to issue are earnestly solicited.

If, however, the Examiner believes that there are any unresolved issues requiring adverse final action in any of the claims now pending in the application, it is requested that the Examiner telephone Eamon J. Wall at (732) 530-9404 so that appropriate arrangements can be made for resolving such issues as expeditiously as possible.

Respectfully submitted,
